Vidioh!

EXPRESS →

Video technical specification

Screen Size Options

Screen Size	Pixel Size	Aspect Ratio
7.0" HD/IPS	1024 x 600	16:9

Quality: LCD high definition all-angle viewing screen

Memory:
512 mb / 460mb of available memory.

Auto Start:
When your card opens, there will be a short delay whilst the video loads. The video will play all the way through and then stop to a blank screen.

Speakers:
Set Up: 8OHM 2W
Output: 2W
Maximum Volume: 55 dB
Optimum Volume: 40 dB

Video Volume:
If supplying multiple videos, please ensure that volume level is consistent across all files.

Video Content:
File Type: MP4
Naming Convention: Up to 460mb can be uploaded to the Vidioh! Card. The card will play the videos in numeric order, lowest first. Our recommendation is to name the videos with a prefix of 01, 02, 03.

For Example:
Video 1 - 01.mp4
Video 2 - 02.mp4
Video 3 - 03.mp4

Please Note: If the aspect ratio of the video file is incorrect for the size of screen the file will be cropped/stretched. If the pixel size is incorrect, the file may not play.

Connection:
Mini USB to USB.

To Load Videos:
It's really simple to load your videos onto the Vidioh! Card. It works in the same way as adding or deleting content from a USB drive.

Battery Charging:
1. Connect the Vidioh! Card to your computer using a mini USB to USB.
2. A battery icon will appear in the top right corner of the screen.
3. When this icon shows a full image, the battery is fully charged.
